Compatible brands:

And many more...

WHY SMART HOMES?

WHY CHOOSE SMART HOME?

- A smart home is a residence that uses internet-connected devices to enable the remote monitoring and management of appliances and systems, such as lighting and heating
- Smart homes contain “smart” versions of common household appliances, such as light bulbs, light switches, electrical outlets, thermostats, locks, doorbells, vacuums, refrigerators, washers and dryers, and so on. These devices are interconnected through the internet, allowing the user to control functions such as security access to the home, temperature, lighting, and a home theatre remotely
- Smart home technology provides homeowners with convenience, cost savings, security, comfort, and energy efficiency by allowing them to control smart devices, often by a smart home app on their smartphone or other networked device
- Designing a truly smart and connected home requires the experience of a professional who will properly plan, design, and seamlessly integrate all your home's smart systems

AFFORDABLE

When getting smart Home system, first consider cost.

At an affordable price you are assured of a peace, simplified living, intelligent lighting etc.

An affordable smart home system can help you save money on your energy bills by allowing you to control your appliances and devices more efficiently.

Many affordable smart home systems are highly customizable, allowing you to choose the devices and features that are most important to you.

Affordable smart home systems are often designed to be user-friendly, making it easy for you to control your devices and appliances with just a few taps on your smartphone

CONVENIENCE

This system allows you to control everything at your finger tips making monitoring very easy via your smartphone.

For example, when you mistakenly forget to close your door or gate, with home automation you do not have to drive back home to lock your doors. All you have to do is to log into your phone from wherever you are and lock your doors.

The home automation setup is one-time and hence makes it easier to use.

SAFETY

This system allows you to control lights and home appliances ensuring your children and the family are safe from unexpected dangers that may occur like fire, while your away.

When you have a call and you leave the gas on , you can turn off the gas using the app on your phone by just logging in to it.

COMMUNICATION

With built in voice commands, communication is made easy between family members who are far apart.

A parent in his room can speak to his children in their rooms without walking to their rooms or scream out their names.

You have full access over your devices such as air conditioners, lights, TV via remote or voice commands.

You can turn on/off your air conditioners with just a voice command.

SAVES MONEY

This is the biggest advantage of home automation. With the ability to control the light (turn on/off) at specific times saves home owner some money.

You can also save fuel by not having to drive all the way back home to turn off your appliances or lock your doors.

HOME ENTERTAINMENT

With this system, separate rooms can enjoy different movies and music using a single unit.

The children can be watching movies in their room and the parent can also be listening to music separately.

FULL AUTOMATION

EASILY CONTROL YOUR HOME'S LIGHTING, ENTERTAINMENT, CLIMATE, SECURITY, AND MUCH MORE!

INTELLIGENT LIGHTS

URC has collaborated with a lot of smart lighting companies to make all light accessible but one device.

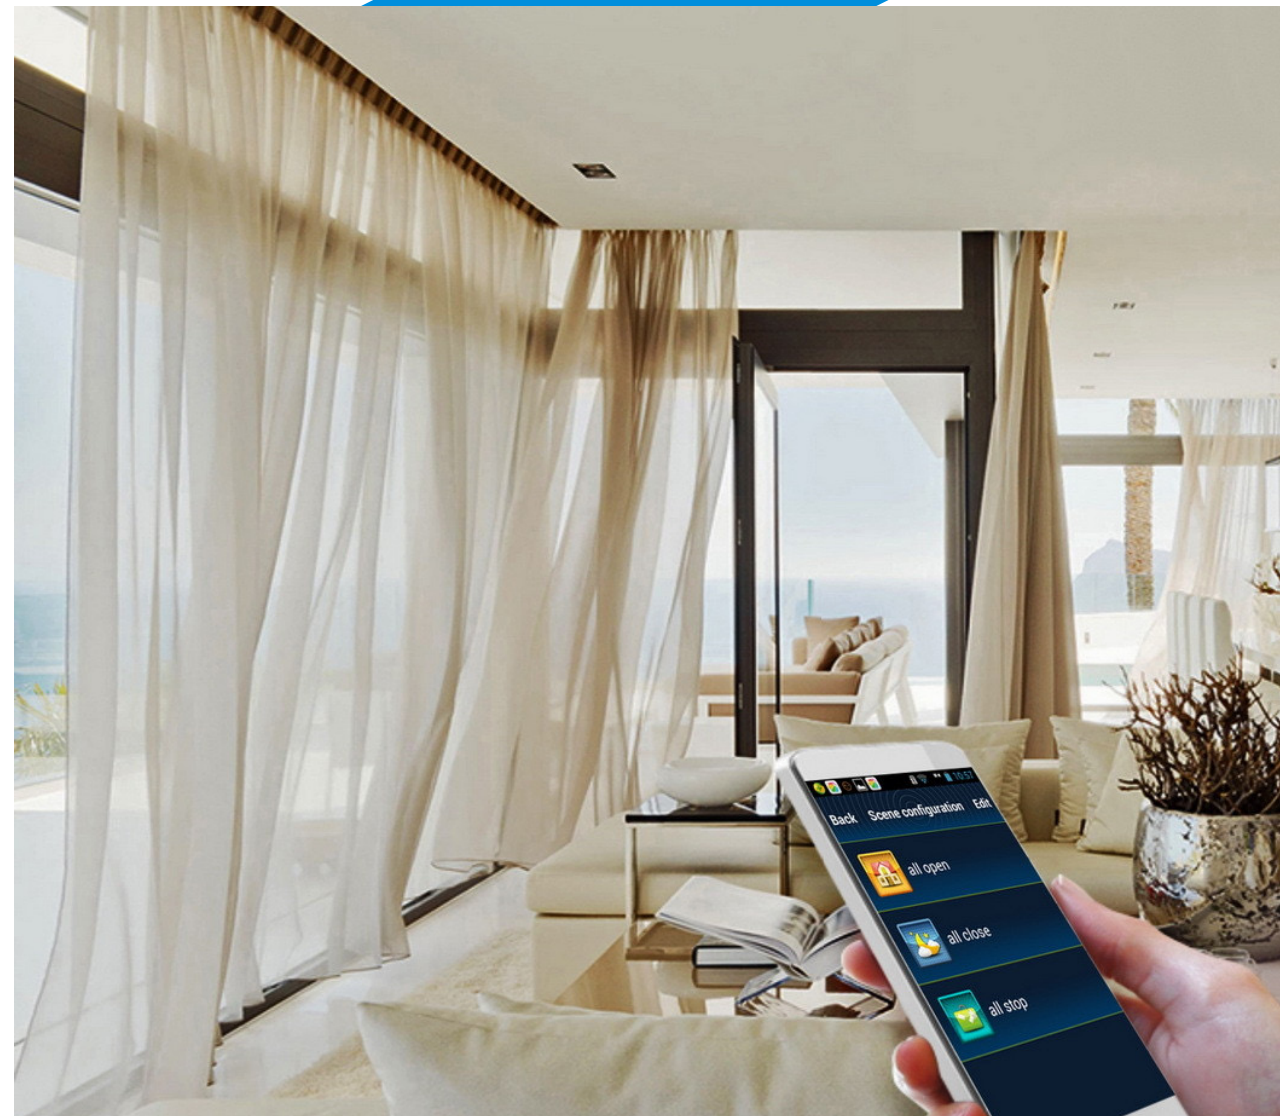

With this you can:

1. Control a wide range of lighting keypads.
2. You can create scene to automate multiple device at a tie.

MOTORIZED CURTAINS

With the URC TOTAL CONTROL system you can control all your motorized curtains and blinds with just one interface, remote or phone

Multi-zone Audio Processor

URC TOTAL CONTROL DID NOT LEAVE THE AUDIO OUT,

We have high definition audio amplifiers which is compatible with everything
speaker and streamer

INTELLIGENT TV

- FULLY AUTOMATED HOME CINEMA

Pull up all your favorite channels, streaming or sports from you TV screen

With URC video distribution, you can watch the same channel or movie in any room with TV.

TEMPERATURE CONTROL

AUTOMATE YOUR AIR CONDITION

Create scenes which will automatically adjust the temperature in your room.

With a remote or the wall panel you can control the temperature in all the rooms.

SMART SECURITY

CONTROL AND MONITOR YOUR HOME

Remotely monitor your home from any where in the world with URC.

Receive notification when an intruder enters your home.

Lock all doors and windows while away.

- This system provides home owners with security control such as motion detection and video monitoring ensuring they are informed when family members arrive home or when there's an unusual activity.
- The ability to see who is at your gate, even before you open, or in your absence with a single touch, gives you a peace of mind without worry.

This system gives you the ability to lock your door remotely, ensuring enhanced monitoring and security.

PROBLEMS & RESOLUTION

With this system, when there is any challenge, the configurator does not need to come physically to your home to have it fixed. Instead, he can log in remotely to get the problem resolved unless the problem requires a physical solution.

For example, if a device has failed to connect or power is unable to come up, this will require a physical solution.
